

1 QC and cell scores

In-tissue spots
>=200 genes, MT <=25%
Top quartile of fibroblast and macrophage scores

GSE251950
9 primary sections ranked

2 Neighborhood contact

Radius 150 um
Null: shuffle labels, 200 times

Keep if above the
95th percentile

3 Ligand-receptor score

Median = receptor x neighbor ligand
Null: shuffle coordinates, 200 times

Retain if >=5/9
and >=5/8 after leave-one-out

4 Peritoneal direction

3 peritoneal tumors, 26 primary tumors
Sample means only
